# SUBJECT INDEX

Figures refer to abstract numbers. In addition to generally accepted abbreviations, the following have been used throughout the index: A audiometry; AC air conduction; AEP auditory evoked potential; AER auditory evoked response; BC bone conduction; BSR brain stem response; CLP cleft lip & palate; COM chronic otitis media; ECOG electrocochleography; ERA evoked response audiometry; F frequency; H hearing; HA hearing aid; HI hearing impaired; HL hearing loss; IE inner ear; L larynx or laryngeal; M muscle; ME middle ear; MR mentally retarded; N nerve; O Otitis; OE outer ear; OM otitis media; RT reaction time; SES socioeconomic status; SOM serous otitis media; SP speech; T threshold; TB temporal bone; TM tympanic membrane; V vestibular; VC vocal cord; VI visually impaired. Lower case abbreviations refer (a) in secondarily indented columns to word(s) immediately preceding in primarily indented column; or (b) to the title word(s) of the category under which the abbreviation is found. Where reference to animal experimentation would not otherwise be obvious, that entry or number has been italicized.
